MARIO TEHOUMY

Software Development - Data Analytics

☎ +9630998633913 @ mariothoumy8@gmail.com 🔗 https://github.com/mario-Te 📍 Syria

SUMMARY

As an innovative and results-driven professional, I bring a unique blend of technical expertise, creative problem-solving, and collaborative leadership to every project I undertake. With a solid foundation in different tech frameworks, I have honed my skills as a software developer and data analyst through hands-on experience and continuous learning.

EXPERIENCE

Full Stack Developer

Hiro Health   📅 10/2023 - Present   📍 Syria-Spain

Med-Tech Company

- As a Full Stack Developer, I specialize in building dynamic and user-centric web applications using a combination of front-end and back-end technologies. With expertise in Angular, Node.js, and Laravel, I have a proven track record of developing robust and scalable solutions that meet business requirements and exceed user expectations.

Data Analyst

Freelancer   📅 2022 - 2023   📍 Damascus

FreeLancer job

- As a Data Analyst proficient in Python, I specialize in extracting valuable insights from complex datasets to drive data-informed decision-making and business growth. Leveraging my expertise in data manipulation, statistical analysis, and visualization techniques, I contribute to the interpretation of data and the formulation of actionable recommendations.

Front End Developer

Aratech   📅 01/2022 - 05/2022   📍 Dubai

Software Company

- As a Laravel Developer, I specialize in building robust and scalable web applications using the Laravel PHP framework. With a strong foundation in back-end development and expertise in Laravel's features and functionalities, I contribute to the development and maintenance of high-quality digital products.
- Which of your achievements match the job you're applying to?

EDUCATION

Software Engineering

Higher Institute of Applied Science and Technology

📅 2014 - 2020

Master Degree in Big Data analytics

Higher Institute of Applied Science and Technology

📅 2022 - Present

SKILLS

| Vanilla JS | Angular JS | React JS | PHP Laravel |

| Node JS | Vue JS | Type Script | React MUI |

LANGUAGES

French — Intermediate   English — Proficient

PROJECTS

Hiro Health

📅 10/2023 - Present   📍 Location

Hiro Health (hiro-health.com)

- As the developer behind the EHR (Electronic Health Record) website for HiroHealth, my focus was on creating a user-friendly and efficient platform for managing patient health records and facilitating healthcare workflows. Here's an overview of the EHR website and my contributions to its development using Angular:
User Interface Design: I collaborated with UX/UI designers to create a clean and intuitive user interface that prioritized ease of use and accessibility.
- Patient Management: One of the core features of the EHR website is patient management, allowing healthcare providers to efficiently record and access patient information.

Beauty Clinical Center

📅 2023   📍 Syria

BeautyClinic (mario-te.github.io)

- Single Page Application (SPA) website using the MERN (MongoDB, Express.js, React.js, Node.js) stack, allowing users to effortlessly book appointments. Leveraging React.js on the frontend, I designed an intuitive user interface where users can input their details, select preferred appointment times, and specify service requirements. On the backend, Node.js and Express.js power the RESTful APIs, handling CRUD operations for appointments, users, and services. MongoDB serves as the flexible NoSQL database.

NewBridge Pharmaceuticals

📅 2022   📍 Dubai

NewBridge Pharmaceuticals (nbpharma.com)

- As a full-stack developer at NewBridge Pharmaceuticals, I contributed to the development of innovative solutions within the pharmaceutical industry. Our focus was on leveraging technology to enhance various aspects of the pharmaceutical business, from drug discovery to distribution.

The Wedding Hack

📅 01/2022 - 05/2022   📍 Dubai

TWH | The Wedding Hack

- "The Wedding Hack" is a project I worked on as a front-end software developer, aimed at revolutionizing the wedding planning experience. Our goal was to streamline the often daunting process of organizing a wedding by leveraging technology to create a user-friendly platform.
